Leanderson Dias de Lima

Technical Support | Cybersecurity Analyst | Cloud Analyst | AWS Developer | SQL | Python
São Paulo, São Paulo, Brazil

Summary

Hello! I am Leanderson, a Developer with over 3 years of experience.

Business Models and Segments
Technology: Software Development, Technical Support, Fintech Testing, Data Analysis, Artificial Intelligence

Technical Knowledge
Back-end: C#, Python

Data: Excel, SQL

Methodologies: Scrum and Kanban

Project Management: Jira, Trello, Bitrix24

Languages
English: Intermediate (B2)

Portuguese: Native

I have 13 years of experience in customer service, which allows me to understand user needs and translate them into efficient and effective solutions. My passion is to develop systems that truly make a difference, and I love working in a team to innovate and create new solutions.

Experience

Cria<digi>
Cloud Infrastructure Analyst
April 2024 - Present (2 years)
São Paulo, Brazil

- Deployment of projects on the AWS platform, configuring services such as Amazon EC2, Amazon WorkMail, Amazon SES, Route 53, DNS, and issuing HTTPS certificates.
 - Performing deployment of projects, ensuring system integrity and performance in both production and testing environments.
- Monitoring Cloudflare indicators, including access IP analysis, detection of suspicious activities, and blocking of malicious IPs.
- Collaborating with internal teams to enhance website security and performance, resulting in an 80% reduction in incident response time and mitigation of intrusion attempts.
 - Creating status and performance monitoring reports for servers using Python, analyzing data retrieved via AWS CLI to provide detailed infrastructure insights and support technical decision-making.

Didox Business Technology · Full-time
Full Stack Developer
November 2023 - December 2023 (2 months)
São Paulo, São Paulo, Brazil · Remote

- Development of the layout using React and Next.js technologies, applying best design practices and ensuring an enhanced user experience.
- Efficient integration with the API through the utilization of Swagger, facilitating communication between the frontend and backend of the application.
- Close collaboration with the backend team, implementing integrations with the backend developed in C# and the .NET framework to ensure seamless synchronization between system layers.
- Establishment and maintenance of an effective communication process with the client, including daily reports and detailed feedback on the application's progress.
- Maintenance of comprehensive technical documentation to facilitate future expansions and system updates.

Wipro
Developer
June 2022 - June 2023 (1 year 1 month)
Curitiba, Paraná, Brazil

- Played a key role in overseeing .sh scripts that orchestrated critical database operations. Utilized MobaXterm to ensure efficient and secure access.

- Took responsibility for maintaining an application built on C# ASP .NET Framework Version 4.0. Demonstrated dedication to its upkeep and enhancement, ensuring attention to detail at every stage.
- Actively contributed to our collective knowledge base (Confluence), keeping it updated and relevant through the Wiki content management system.
- Led the coordination of test scripts and ensured the flawless operation of the application. Each functionality was thoroughly evaluated following implementations.
- Proactively addressed vulnerabilities identified by the Checkmarx system, providing precise analyses and effective solutions to safeguard system integrity.
- Reporting meetings were conducted entirely in English.

Fundação Estudar

Volunteer

March 2023 - May 2023 (3 months)

São Paulo, Brazil

100 hours learning and applying sales, public speaking and communication skills.

Keeggo

QA Test Analyst

January 2022 - June 2022 (6 months)

São Paulo, Brasil

- Decoding Terminal's Bit Map as per ISO 8583, delving into the codes' mysteries and uncovering the potential of successful messages.
- At the Vanguard of Errors: Error hunter during certifications, translating challenges into opportunities and ensuring flawless paths.
- Weaving Test Evidence: With the aim of assuring quality, I created tangible proofs of test excellence, meticulously transforming raw data into solid outcomes.

- Awakening Tests: I acted as the conductor of tests, rousing systems for diverse scenarios and ensuring their resilience was tested at every turn of the road.
- Journeys in Specifications: I mapped and translated the technical and functional boundaries, ensuring all directions were charted with clarity and precision.
- Nurturing and Examining Test Cases: I sowed the seed of test cases and nurtured them to maturity, reaping valuable insights that shaped the destiny of quality.

Mottu

Customer Relationship Management (CRM)

October 2020 - November 2021 (1 year 2 months)

São Paulo, Brasil

- Sales: In an ever-evolving sales landscape, I devised strategies that captivated clients and fostered lasting relationships.
- Language of Data: SQL was my dependable tool to uncover insights, allowing me to mine valuable information and substantiate informed decisions.
- Idwall Reports: With precision, I analyzed Idwall reports, extracting valuable information that guided decisions regarding client eligibility.
- LW Insights: I delved into the complexities of the LW fines system, steering the course in alignment with regulatory nuances, ensuring a coherent resolution of various cases.
- Octadesk and Zendesk: Like a conductor of client interactions, I orchestrated service experiences, harmonizing interactions using Octadesk and Zendesk.
- User's Voice: Beyond transactions, I took on the role of a user experience advocate, actively engaging to shape exceptional journeys.
- Composure Amidst Chaos: Faced with emergencies - thefts, accidents, and unforeseen situations - I remained composed, orchestrating agile solutions and restoring calm, providing assistance to clients.

Ikê Assistência Brasil

2 years 2 months

Backoffice

June 2019 - December 2019 (7 months)

São Paulo e Região, Brasil

- Demand Architect: I undertook the strategic role of distributing service demands, weaving an agile network to ensure operational fluidity.
- Operational Strategist: Amidst complexity, I assumed the guide's position in operational queries, charting clear paths in a landscape full of challenges.
- Master of Critical Emails: I confronted critical cases through emails and service protocols, turning each message into an opportunity to resolve intricate situations.
- Productivity Report Preparation;
- Submissions for Service Providers' Payments.

Customer Care Analyst

November 2017 - June 2019 (1 year 8 months)

Barueri, São Paulo, Brasil

- Master of the Art of Service: I acted as a guiding light in receptive customer service, leading with empathy and expertise to provide accurate solutions.
- Partnership Orchestrator: I played a pivotal role in service provider activation, weaving strong relationships that propelled success.
- Guardian of Journeys: I maintained a watchful eye over ongoing requests, operating as an unseen maestro to ensure each journey was smooth and efficient.

Locaweb

Technical Support

February 2017 - August 2017 (7 months)

São Paulo, Brasil

- Pioneering the B2B Frontier: I navigated the B2B realm with finesse, shaping tailored solutions and cultivating strategic connections.
- Art of Analysis: I meticulously analyzed open calls and protocols, unraveling complexities to craft effective responses.

- Knowledge Sculptor: I authored Wiki pages, refining precise answers to product queries and sharing invaluable insights.
- Wordpress++ Maestro: I mastered the Wordpress landscape, translating ideas into captivating and immersive platforms where every pixel narrates a story.
- HTML Virtuoso: I authored and rewrote HTML code, weaving life into elegant and interactive pages.
- Technological Architect: I configured Virtual PABX, Gsuit, and SMTP, erecting technological pillars that enhanced efficiency and communication.
- Online Space Craftsman: I erected digital structures as a website builder, molding domains and DNS zones to shape robust virtual spaces.

Cappta

1 year 9 months

Billing Assistant

July 2015 - March 2016 (9 months)

São Paulo, Brasil

- Dashboards: I crafted reports that portrayed delinquency and productivity metrics clearly and succinctly, molding data into insightful visual frames.
- Voice of Action: I was the active voice during collection calls, weaving dialogues that untangled knots and opened doors for resolutions.
- Progress Cultivator: I consistently sought the path of continuous improvement, exploring trails that steer clear of customer loss and unveil new opportunities.

Systems Analyst

July 2014 - July 2015 (1 year 1 month)

Barueri, São Paulo, Brasil

- Technical Support Alchemist: I transformed challenges into solutions through remote access, unraveling mysteries and restoring normalcy.
- Mastering the DOS Territory: I navigated the DOS realm with finesse for precise diagnostics, utilizing tools like Ping, Tracert, and NsLookUp to decode the problem's intricacies.

- Relationship Strategist: I played the role of negotiation and argumentation architect, wielding sharp skills that captivated and retained customers, fostering strong and fruitful alliances.

Education

Univesp Oficial

Graduation, Bachelor of Information Technology · (June 2024 - July 2027)
